

Legionella Awareness.

T. +44 (0) 3300 88 65 85

Legionella is bacteria which can lead to Legionnaires Disease through warm aerosol producing systems such as Air Conditioning Units. This course will raise awareness to all those that has these systems on site and what precautions can be taken to ensure that people are not exposed to this potentially harmful bacterium.

Test and Certifications:

At the end of the course you will be given a test of 20 multiple choice questions. The required pass rate is 85%.

You will be able to download and print (if required) a digital certificate on completion of the course.

Main course certificates last 3 years. (Refresher courses are available and recommended every 12 months).

Video Presentations.

Interactive games.

Test and Certification.

“With Legionnaires' disease it:

Is a type of pneumonia;

Affects around 5% of those exposed to the bacterium;

There is 2-10 days incubation where symptoms start showing after being initially exposed;

Unfortunately Legionnaires' disease can kill, Fatality rates are 1 in 8 of affected people (12%) die.”
