

Local Exhaust Ventilation

Local Exhaust Ventilation

From kitchens to steel work production it is vital to ensure that your LEV is working properly and effectively. Even if you have an LEV in your establishment, do you know that it is working properly? Would you know what to look for if it isn't? This course will aid you through the manufacturing process and on to the up keep and maintenance of the LEV system.

Test and Certification:

At the end of the course you will be given a test of 20 multiple choice questions. The required pass rate is 85%.

You will be able to download and print (if required) a digital certificate on completion of the course.

Main course certificates last 3 years. (Refresher courses are available and recommended every 12 months).

Who is this training for?

Any organisation that employees people with an LEV in its vicinity. If your workplace generates dust, vapour, mist or fumes then you need to consider training your staff in Local Exhaust Ventilation (LEV).

What does the course cover?

- Legal Aspects.
- Components of an LEV system.
- What can happen when it goes wrong!
- Management and use of an LEV system.

Training Outcomes:

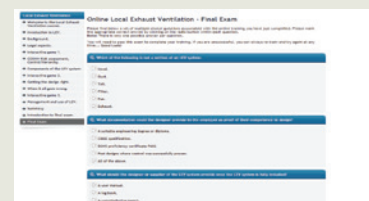

- Learning what an LEV System is
- What the law says.
- How to ensure the system is used and maintained correctly.

Video Presentations.

Interactive games.

Test and Certification.

“Thousands of employees made ill by contaminants they were breathing in at work, despite using extraction and masks. The controls of LEV and masks were not controlling exposures”

Health and Safety Executive - HSE
